

# ULV Disinfectant Fogging Prep

## AREAS TO RECEIVE TREATMENT

**Declutter your space.** Decluttering the space gives our technicians ready access to the areas you want the disinfection work done. Allowing them to properly do their job and for you to receive optimal effectiveness.

- **Remove all loose papers or stuff from desktops**

**Have surfaces cleaned with soap and water (or cleaner) before receiving treatment,** focusing on high touch surfaces (tables, doorknobs, countertops, handles, desks, phones, light switches, toilets, sinks, etc. Cleaning before reduces the number of germs, dirt, and impurities on the surface. Disinfecting kills germs on surfaces.

**Time needed for fogging.** Staff or residents need to vacate the premises for 2 hours while our specialists are at work.

*\*We do offer cleaning services before fogging treatment for an additional fee*

*(Wiping and disinfecting high-touch areas: counter-tops, tables, door handles, light switches, toilets, etc.)*
